

Application No. 10/645,312  
Amendment dated October 4, 2005  
Reply to Office Action of July 6, 2005

Docket No.: 58288(72021)

**AMENDMENTS TO THE ABSTRACT**

On the last page of the application, please replace the text of the Abstract with the following amended text:

Novel 5-substituted-2-arylpyrazine compounds are provided. Such compounds can act as selective modulators of CRF receptors. Compounds of the invention are provided by the following formula:

The 5-substituted-2-arylpyrazine compounds provided herein are useful in the treatment of a number of CNS and peripheral disorders, particularly stress, anxiety, depression, cardiovascular disorders, and eating disorders. Methods of treatment of such disorders and well as packaged pharmaceutical compositions are also provided.

Compounds provided are also useful as probes for the localization of CRF receptors and as standards in assays for CRF receptor binding. Methods of using the compounds in receptor localization studies are given.
